## Relevant Experience

2018–2019 **Senior Developer**, *New York, New York, SAM.*

I was the technical co-founder to a startup. The project went on hiatus indefinitely due to cofounders (including myself) having other obligations.

- Designed API with founders in OpenAPI on Swagger
- Developed frontend for SPA in React and backend in Django
- Created DevOps system with Docker and provisioned on AWS

2017–2018 **University Lecturer**, *Tallinn University of Technology*, Tallinn, Estonia.

I taught "Fundamentals of Python" and "Advanced Python" to bachelors students

- Tested students ability to use primitive data types, Lists, and Dictionaries using a file with three unit tests
- Gave lectures and exercises on python features including concurrency with threads and asyncio, decorators, iterators, generators, and comprehensions
- Created challenges and aided students with popular libraries, like Django, Flask, NumPy, Pandas, Request, and Scikit-learn

2015–2017 **Lead Developer**, *Like A Local Guide*, Tallinn, Estonia.

I took full responsibility for the maintenance and development of "likealocalguide.com". I furthered the company's vision of the project, evolving the website to a more social platform. As the main steward of the project, I lead other developers who also worked on the project.

- Implemented Sales Funnels from Google Analytics, finding what steps users got lost when booking tours and adding content
- Extracted, Transformed, and Loaded (ETL) over 100,000 cities from GeoNames, while deduplicating matching the cities from GeoNames to our existing cities
- Migrated deployment from Archlinux to CentOS
- Increased site speed on pages by caching expensive operation results with redis and query optimization with PostgreSQL
- Maintained CentOS server and CentOS Vagrant development environment
- Scaled product by adding PgBouncer, upgrading server hardware, and appropriately tuning number of worker processes to new hardware
- Implemented designs and features on the frontend with SASS and jQuery and on the backend with Django
- Interviewed and managed other developers working on the project

2015 **Developer**, *Cakebet*, San Francisco.

I contracted as a developer for a Bitcoin casino.

- Implemented Sales Funnels from Google Analytics, finding what steps users
- Built a currency converter for covering most fiat and numerous cryptocurrencies, that could update at a very high frequency (<3 seconds)

## Education

May 2018 - **BA Mathematics**, *Thomas Edison State University*, Trenton, New Jersey.

March 2020 Bachelor's project: *Explaining Black Boxes: Interpretable Machine Learning*. GPA 3.8/4.0

## Skills

**Programming Languages:** Python, JavaScript (ES5, ES6, TypeScript), Shell (Posix, bash), Emacs Lisp, Matlab/Octave, R

**Frameworks & Libraries:** React, Express, JQuery, Django, Flask, Pandas, Numpy, Sparklyr

**Document Languages:** HTML, Markdown, reStructuredText, L<sup>A</sup>T<sub>E</sub>X, OpenAPI (swagger)

**Databases:** PostgreSQL, MySQL, SQLite, Redis, MongoDB, Apache Spark

**Deployment Environments:** Docker, Docker Compose, RHEL (CentOS), Vagrant, Kubernetes

## Projects and Open Source

**Grid Validator**, <https://gridvalidator.com/>

Validates, previews, and helps debug `grid-template-areas` CSS property values. Built Grid Validator with TypeScript and React <https://github.com/evrom/grid-validator>

**Stylelint**, <https://github.com/stylelint/stylelint/>

Added the validation rule to Stylelint named `grid-areas-no-invalid` <https://github.com/stylelint/stylelint/pull/5167> to validate `grid-template-areas`

**Hurst**, <https://crates.io/crates/hurst>

Calculates estimated Hurst exponent on time series data. Written in Rust.

**Hurst Exponent**, <http://hurstexponent.com/>

View estimated Hurst exponent of time series data. Uses Hurst compiled to WebAssembly. Built with TypeScript, React, and D3.js
